Experience and Background

I work as a Specialist Rehabilitation Case Manager providing comprehensive assessment and proactive case management for children and adults with complex orthopaedic, neurological (including acquired brain injury) and psychological injuries.

As a part of my job, I work closely with clients and their families, their solicitors, and a variety of health and social care professionals to achieve rehabilitation goals set out by clients.

I have worked with major injury services dealing with clients who have suffered severe trauma and catastrophic injuries such as traumatic brain injuries, spinal injuries, FND and amputations.

I am also experienced working in burns and plastics as a part of a multidisciplinary team to treat and rehabilitate burns patients. This included acute care, planning for surgery and skin grafting and flaps, post-surgical rehabilitation and functional restoration, including vocational rehabilitation for clients following burns injuries.

I am efficient in writing up comprehensive and detailed reports and updates following thorough assessments.

** Please note that following the INA or similar assessment, we will always aim for the ongoing case management to be completed by the assessing case manager. In the instance this is not possible, the case will be delegated to our experienced inhouse case management team to provide remote support.*
