## Key Skills

- Working with clients with orthopaedic and neurological injuries including spinal cord and head injury and FND.
- Assessment, planning and delivery of bespoke rehabilitation and functional restoration programmes for people with long-term persistent pain problems eg CRPS, fibromyalgia, etc.
- Identifying and working with clients who show early signs of developing persistent pain.
- Assessment, planning and delivery of bespoke rehabilitation programmes for people with multiple and complex trauma e.g. multiple fracture, amputation, acquired brain injury, visceral damage and neurological deficit.
- Rehabilitation into employment and occupational physiotherapy
- Liaising with co-ordinating and overseeing clinicians involved in the delivery of integrated rehabilitation programmes.
- Manfred has adults and younger clients on his caseload.

## Experience and Background

Manfred qualified as a physiotherapist in 1993 and went on to study psychology at the University of Maastricht, he has also completed formal training as a disability analyst.

Manfred started as a case manager in 2010 and is experienced supporting clients with severe injuries following RTA or work-related injuries, providing immediate needs assessments and rehabilitation, providing and maintaining reports for solicitors, and funding for treatment and referrals to specialists and organising ongoing treatments.

Manfred has experience in orthopaedics and MSK conditions, neurology including brain injury and FND, mental health, general disability, chronic pain management and long term conditions.

*\* Please note that following an INA or similar assessment, any ongoing case management will be completed by one of our experienced inhouse case managers via remote / desktop support.*
