Profession

Physiotherapist

Education and Training

BSc (Hons) Physiotherapy

Memberships and Affiliations

HCPC - PH45318
CSP - 052479

Biography

After graduating with a BSc (Hons) in Physiotherapy from Coventry University, Rebecca worked in the USA and the private sector and held several roles within the NHS. She then progressed to a senior position in neurology and neurosurgery, and as a Clinical Lead in a large NHS Rehabilitation Centre in Sussex.

Rebecca has specialised in neurology for over 20 years, helping patients and their families manage a wide range of issues resulting from neurological (including brain injury and FND), orthopaedic, and pain conditions. She implements individually designed exercises for the long-term management of conditions, and has extensive experience in treating clients with pre-existing disabilities and complex comorbidities, taking all past medical history into account when formulating rehabilitation and vocational plans for patients.

Rebecca is fully trained in the Bobath approach to neurological rehabilitation and has experience in spasticity management, vestibular assessment and treatment, orthotics, hydrotherapy, functional electrical stimulation (FES), Saebo, and the Mollii suits. Through problem-solving and having a practical approach to functional disability, Rebecca develops bespoke treatment plans, considering both the psychological and social aspects of each client, allowing her to make informed decisions on the most pertinent treatments to carry out.

** Please note that following the INA or similar assessment, we will always aim for the ongoing case management to be completed by the assessing case manager. In the instance this is not possible, the case will be delegated to our experienced inhouse case management team to provide remote support.*
