- Burns and plastics surgery recovery
- Neurological disorders and injuries

Ages treated: children, adolescents and adults

Areas covered: East Midlands

Clinical & Professional Experience

Debjani qualified in physiotherapy in 2002 and undertook a master's degree in physiotherapy in 2004. She began working in the personal injury sector soon after qualifying undertaking comprehensive assessments and case managing complex cases for both adults and children.

Debjani has particular experience in working in burns and plastics as a part of a multidisciplinary team to treat and rehabilitate burns patients. This included acute care, planning for surgery and skin grafting and flaps, post-surgical rehabilitation and functional restoration, including vocational rehabilitation for clients following their burn injuries. She also has experience with major injury services dealing with clients who have suffered severe trauma and catastrophic injuries such as traumatic brain injuries, spinal injuries and amputations.
