

MARK CONLON

BSc MSc MCSP HCPC

Key Skills

- Persistent pain and functional restoration
- Multiple and complex trauma
- Return to work/vocational rehabilitation

Ages treated: Adults 18+

Areas covered: East Anglia

Clinical & Professional Experience

Mark qualified as a Chartered Physiotherapist in 2011 and has worked in a range of physiotherapy roles in East Anglia in NHS, medico-legal and insurance settings.

As well as his physiotherapy background, Mark has experience working for the Department for Work and Pensions completing health assessments for clients with permanent disability and as a case manager assessing and managing seriously injured clients in the medico-legal field.

Mark is experienced in the management of persistent pain, functional rehabilitation, long-term conditions and disability. Mark is particularly skilled in the following areas:

- Assessment, planning and delivery of bespoke rehabilitation and functional restoration programmes for people with long-term persistent pain problems eg CRPS, fibromyalgia, etc.
- Identifying and working with clients who show early signs of developing persistent pain.
- Assessment, planning and delivery of rehabilitation programmes for people with multiple and complex trauma e.g. multiple fracture, acquired brain injury, and neurological deficit.
- Rehabilitation into the job market.

Mark will work with clients from the initial assessment, setting realistic goals, co-ordinating and overseeing the clinical interventions and producing accurate succinct reports and updates to keep the interested parties informed of the clients' progress. Mark will provide close support to the client and the family throughout their rehabilitation.
