## Biography

Ronak has significant experience as a Senior Musculoskeletal and Orthopaedic physiotherapist with the NHS and the private sector. With 4+ years of case management experience within the medico-legal sector, he specialises in managing complex rehabilitation cases across acute, post-operative, and chronic presentations, including but not limited to fractures, Ilizarov frames, FND, amputations, nerve injuries, and psychological and traumatic brain injury. With a keen interest in highly complex polytrauma, he is experienced in delivering evidence-based assessments and treatment plans for musculoskeletal, orthopaedic, neurological and conditions with persistent pain, with a strong focus on restoring function and facilitating safe, timely return to daily activities or work. He is adept at coordinating multidisciplinary care, navigating the NHS, local and private healthcare pathways, and liaising with medical teams, insurers, and employers to ensure seamless, outcome-focused patient rehabilitation within the biopsychosocial element of rehabilitation.

Ronak is committed to supporting clients through every stage of their rehabilitation, taking a patient-centred approach to care. He consistently goes above and beyond to understand individual needs, motivate progress, and advocate for the best possible outcomes. His dedication to building trust and empowering patients plays a key role in achieving sustainable rehabilitation goals and enhancing overall quality of life.

*\*Please note that following the INA or similar assessment, we will always aim for the ongoing case management to be completed by the assessing case manager. In the instance this is not possible, the case will be delegated to our experienced inhouse case management team to provide remote support.*
