CSP - 115787

Biography

Adebola is a Musculoskeletal Specialist Physiotherapist with nearly a decade of clinical experience, currently working as a First Contact Practitioner within primary care and as a clinical case manager. Over the years, Adebola has developed strong clinical reasoning, assessment, and communication skills, managing a wide range of MSK presentations independently. Adebola is confident in assessing complex cases, identifying red flags, and making appropriate onward referrals.

Adebola utilises their skills and clinic based knowledge to support case managed patients holistically, beyond just the physical aspects of care. Adebola enjoys coordinating care, navigating services, and ensuring that patients receive the right support at the right time, whether that is through triage, referral, or signposting.

** Please note that following an INA or similar assessment, any ongoing case management will be completed by one of our experienced inhouse case managers via remote / desktop support.*
