BSc Physiotherapy

Accelerated Doctor of Physical Therapy

## Memberships and Affiliations

HCPC - PH96650

MCSP - 117092

## Additional Languages

Urdu

## Biography

Danish graduated with a BSc (Hons) in Physiotherapy from the Jinnah Postgraduate Medical Centre in Karachi and went on to complete an MSc in Musculoskeletal Physiotherapy at Queen Margaret University in Edinburgh. His academic background has provided a strong foundation in evidence-based practice and clinical reasoning. Danish has worked across a wide range of clinical settings, and is passionate about empowering individuals to take an active role in their recovery, promoting independence and long-term wellbeing.

In 2023, Danish began working as a FCP, where he enhanced his expertise in advanced assessment and early intervention within Primary Care Clinics. He designs and delivers comprehensive physiotherapy treatment programmes, incorporating manual therapy, electrotherapy, patient education, and dry needling techniques. Danish adopts a holistic and patient-centred approach, tailoring every intervention to meet the unique needs, goals, and lifestyles of his clients to optimise functional recovery and quality of life.

*FCPs are highly experienced clinicians working within a multidisciplinary team, collaborating with GPs and other healthcare professionals who can assess and diagnose a range of MSK conditions. They regularly provide advice, treatment plans, and arrange referrals to other specialist services, or further investigations including scans. Some may also undertake injections and prescribe medications.*

*\* Please note that following the INA or similar assessment, we will always aim for the ongoing case management to be completed by the assessing case manager. In the instance this is not possible, the case will be delegated to our experienced in-house case management team to provide remote support.*
