Biography

Haruna is an experienced Physiotherapist with a background in musculoskeletal and rehabilitation practice. He qualified as a physiotherapist in 2017 and initially worked as a general physiotherapist, gaining broad clinical experience. Since moving to the UK, he has worked in both community rehabilitation and ward-based rehabilitation settings, supporting patients with functional recovery and promoting independence in activities of daily living. He has particular expertise in Functional Neurological Disorder (FND), orthopaedic injury, and amputation.

Haruna currently works as a First Contact Physiotherapist (FCP), a role he commenced in 2024. In this position, he undertakes advanced assessment, triage, and management of musculoskeletal presentations within primary care, facilitating appropriate referrals and coordinated care. His clinical background supports his role in conducting initial needs assessments and contributing effectively to case management through a patient-centred and multidisciplinary approach.

FCPs are highly experienced clinicians working within a multidisciplinary team, collaborating with GPs and other healthcare professionals who can assess and diagnose a range of MSK conditions. They regularly provide advice, treatment plans, and arrange referrals to other specialist services or further investigations, including scans. Some may also undertake injections and prescribe medications.

** Please note that following an INA or similar assessment, any ongoing case management may be completed by one of our experienced in-house case managers via remote / desktop support.*
